1 {æ} DITA Toolchain Distribution 0.24.0

The *software distribution* covered by this document contains *components* and *subcomponents* restricted by individual license terms.

This document is part of the *software distribution annex* which addresses the obligations deduced from the *effective licenses*. The software distribution is made available or transferred only in corresponding combination with the software distribution annex.

The component licenses and notice files are provided as part of the software distribution annex. Individual license texts may be omitted in case the terms are restricting the distribution.

License obligations of the individual components, as far as these can be addressed in documentation, are detailed in section [License Notices](#) on page 12.

1.1 {metæffekt} GmbH Proprietary Components

Proprietary components included in the covered software distribution developed and supplied by {metæffekt} GmbH are made available - if not explicitly marked otherwise - under Apache License 2.0.

1.2 Third-Party Proprietary Components

The covered software distribution contains proprietary third-party components. These are generally licensed individually under vendor-specific license terms, which further apply towards the licensee of {metæffekt} DITA Toolchain.

License and contract information regarding proprietary licenses are covered in section [License Notices](#) on page 12. License texts are included in the corresponding software distribution annex when permitted by the terms of the license and/or contract.

1.3 Open Source Components

In general, for each and every open source component the individual terms and conditions of the *associated license* apply. The licensee of an open source component is granted a non-exclusive right of use by the respective right holders restricted by the stipulated terms and conditions defined in the associated license. In particular, liability and warranty regulations of the individual open source license apply.

Specific liability and warranty definitions of {metæffekt} DITA Toolchain, if any, are subject to the contractual agreement under which the software distribution is made available. Specific liability definitions are unaffected by the terms of the individual open source licenses.

In case a license demands the provision of source code for a component, the source code is made available by adding source code artifacts to the software distribution annex or by making the source code available as individually outlined in the [License Notices](#) on page 12.

1.4 Public Domain Components

Public domain components have generally waived all property rights. Nevertheless, public domain components are associated with terms that need to be addressed in compliance.

1.5 Import / Export Information

The country, the software distribution is supplied to, may have restrictions on the import, possession, and/or use of the software. Furthermore, the export or re-export of the software distribution to other countries may be restricted or even prohibited.

Before using or re-exporting this distribution check the country specific laws, regulations and policies. For more information, see also <http://www.wassenaar.org>.

This software distribution does not include any component classified as restricted to export/import.

Please note that {metæffekt} GmbH does not take any responsibility for the correctness, actuality, and content of the above external links.

2 Bill of Materials

Subsequently all included third-party components are listed with references to the licenses and/or contracts.

The herein covered software distribution contains **Apache Ant** with subcomponents.

In the present version, Apache Ant and the included subcomponents are stipulated to the terms of the Apache License 2.0, W3C Software Notice and License (2002) and Public Domain.

Further, the W3C Software Notice and License requires to retain the license conditions and disclaimer.

Permission to copy, modify, and distribute this software and its documentation, with or without modification, for any purpose and without fee or royalty is hereby granted, provided that you include the following on ALL copies of the software and documentation or portions thereof, including modifications:

1. The full text of this NOTICE in a location viewable to users of the redistributed or derivative work.
2. Any pre-existing intellectual property disclaimers, notices, or terms and conditions. If none exist, the W3C Software Short Notice should be included (hypertext is preferred, text is permitted) within the body of any redistributed or derivative code.
3. Notice of any changes or modifications to the files, including the date changes were made. (We recommend you provide URIs to the location from which the code is derived.)

Title to copyright in this software and any associated documentation will at all times remain with copyright holders.

Notes

This version: <http://www.w3.org/Consortium/Legal/2002/copyright-software-20021231>

This formulation of W3C's notice and license became active on December 31 2002. This version removes the copyright ownership notice such that this license can be used with materials other than those owned by the W3C, reflects that ERCIM is now a host of the W3C, includes references to this specific dated version of the license, and removes the ambiguous grant of "use". Otherwise, this version is the same as the previous version and is written so as to preserve the Free Software Foundation's assessment of GPL compatibility and OSI's certification under the Open Source Definition.

The license file and notice file of the W3C SOFTWARE NOTICE AND LICENSE are provided in the software distribution annex.

In the present version, Apache Fontbox is stipulated to the terms of the Apache License 2.0 and the BSD 3-Clause License.

The BSD 2-Clause License requires to retain the component specific copyright:

Apache Fontbox: Copyright (c) 2006-2007, www.fontbox.org All rights reserved.

Further, the BSD 3-Clause License requires to retain the license conditions and disclaimer:

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. Neither the name of fontbox; nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

Saxon HE is marked as *Incompatible With Secondary Licenses* as described in Exhibit B in the Mozilla Public License 2.0. Exhibit B of Saxon HE includes the following statement:

Glossary

Artifact

An artifact is a physical file, such as an executable binary, an archive, a document, a text or configuration file.

Associated Licenses

An artifact can be distributed by a provider under different licenses depending on the context or the channels in which the artifact is made available or transferred. These licenses are associated with the artifact when downloading or receiving the artifact and are referred to as associated licenses. In contrast to the associated licenses, the effective licenses are the licenses under which the artifact is further distributed. The associated and effective licenses of an artifact can differ, but are restricted by the terms of the associated licenses.

Component

A component is a group of one or more artifacts, packages or web modules. A component can be regarded as logical aggregate. Licensing information applies on component-level and is consistent within the aggregated artifacts, packages and web modules.

Effective Licenses

There are various cases where a component is made available by a provider under multiple associated licenses. The effective licenses are the selected licenses relevant for the software distribution:

- A component is provided with a dual or multiple licensing option where either one or the other license can be used for distribution. In this case a single effective license needs to be determined.
- A component is provided with a license in a specific or later version. In this case a version of the license has to be selected as effective license.
- For a component, which contains subcomponents the license of the component and the individual licenses of the subcomponents are effective.
- The associated license of a component allows to sublicense the component under a different license. In this case the chosen license is the effective license.

Software Distribution

A software distribution is packaged for delivering the software to a recipient. Depending on context and relationship between the provider and recipient of a distribution the license terms of the covered components have to be addressed. A software distribution may be an executable, an archive or a filesystem image.

Software Distribution Annex

The software distribution annex aggregates all information required to fulfill the obligations when making available or transferring the software distribution. It covers the following elements:

- The associated and effective license terms and notices of the individual components.
- The source code of components if stipulated by the effective license.
- Documentation including the bill of materials of all third-party components with appropriate license and notice information.

Subcomponent

A subcomponent is a component embedded in a larger component. A subcomponent may have dedicated associated licenses.
